

The diagram illustrates the structure of a Bluetooth packet. It consists of three main components: a top teal box labeled 'Payload', a bottom-left teal box labeled 'Bluetooth MAC Address' with '6 bytes' below it, and a bottom-right pink box labeled 'Broadcast Data' with '0 - 31 bytes' below it. Teal lines connect the top corners of the bottom boxes to the bottom corners of the top box, forming a triangular shape.

Payload

Bluetooth
MAC Address
6 bytes

Broadcast Data
0 - 31 bytes
